

Company Profile  
**Specialty Natural Products Co., Ltd.**

“What the **nature** provides,  
We **purify, enhance and standardize** for healthier living.”

## SPECIALTY NATURAL PRODUCTS CO.,LTD.

is the leading manufacturer of standardized Asian botanical extract of world's pharmaceutical, dietary supplement, nutraceutical, functional food, and cosmetic industries.

**SNP** combines the latest research finding and traditional knowledge in pharmacology and pharmacognosy with advanced analytical techniques and quality assurance in every step of our production process.

Our state-of-the-art technology demands raw materials of superior quality. Therefore, we only use the finest material – carefully sourced and subjected to strict quality control processes at every stage of production. Production process and finished products are monitored and analyzed by fully trained QA team, together with stringent storage control management to ensure the quality of our products. Each of our proprietary active substances has a unique fingerprint. The utilization of High Performance Liquid Chromatography (HPLC) enables us to certify the availability of active ingredients at specific concentrations.

**“The outcome? Guaranteed results! And we can do this for each and every single product of SNP. It's an achievement we are proud to claim.”**

## SNP Consistent Products

**SNP** was set up to establish the production of therapeutic plant botanical extracts using the most advanced production techniques and methodologies available to serve the world's requirements.

## SNP Customer Service : formulating Advice

**SNP's** state-of-the-art plant and experienced fully trained staffs combine to offer a full range of services to the cosmetic industry. These include formulating and supplying difficult-to-manufacture botanical extract, manufacturing semi-finished bases for the production. **SNP** also offers access to full botanical extract, product efficacy testing and, certification.

“Let's face it: **natural** is variable.

**SNP'S** botanicle extracts are not. We offer standardized uniform **batch to batch** -year in, year out”

Specialty Natural Products Co., Ltd. discovers the solutions of the issue by the utilization of:

- Analytical technique to precisely provide the “*fingerprints*” of the active ingredients.
- Modern processing equipment which enable modular approach in extraction and purification.
- Total quality control that ensure the quality of standardized products to meet international specifications.

## Company Statement

“As a knowledge-based industry, we aim to give our customers sustainable competitive edge by serving consistently superior products with punctual delivery at reasonable prices, together with technical advices backed by the most updated research network.”

Specialty Natural Products Co., Ltd. is recognized by Thailand's Board of Investment as a prototype of a brand new industrial sector concerned with the production of medicinal plant extracts, using the most advanced production techniques available.

## SNP consists of

The utilization of the state-of-the-art facility together with the most sophisticated forms of technology available and constantly updated scientific research and development allows SNP to be a manufacturer of uniform quality products.

- Built-in quality assurance at every stage of the production process
- Usage of the modular approach
- Flexible layout permitting minor upgrades to meet higher standards and future technologies
- Certified plant site to relevant certifying authorities
- Dedicated fully trained staff in the most up-to-date manufacturing, analytical, quality control, research and development, and quality assurance.

"The reason for our dedication to quality is simple: the better our products are, the better our customers' products will be. Our product quality gives our customers a competitive edge. Their sales growth becomes our sales growth."
